lipid staining polysaccharides calcium binding sites ATPase activity osmium impregnation 1477
Tarragon
Artemisia dracunculus essential oil phenylpropenes allylanisole tissue culture 365
Artemisia dracunculus essential oil phenylpropenes allylanisole tissue culture methyl eugenol 377
Temperature
Bromelia humilis CAM PPFD dark respiration VPD water stress 25
muskmelon *Cucumis melo* L. seed priming germination vigour development 393
carbon export carbohydrates photosynthesis sunflower 845
anoxia wheat seedlings pH 1427
Temperature acclimation
Glycine max photosynthesis light acclimation photosynthate partitioning 853
Temperature response
Lycopersicon ammonium nitrate chilling 331
Tension
Ferocactus acanthodes Opuntia ficus-indica reverse flow water potential 143
Thermal time
wheat development base temperature *Triticum aestivum* 1077
Thermotropic transition
germination alcohols 113
Thin layers
Nicotiana tabacum polyamines polyamine biosynthesis inhibitors rhizogenesis 1575
Thioglucoside glucohydrolase
β-thioglucosidase *Brassica* monoclonal antibodies myrosinase myrosin cell 1541
β-Thioglucosidase
Brassica monoclonal antibodies myrosinase myrosin cell thioglucoside glucohydrolase 1541
Tillering
Triticum aestivum soil moisture soil strength root drought stress biomass yield leaf phenology wax 1225
Tissue composition
ammonium nitrogen nutrition root-zone pH soybean 189
Tissue culture
cytokinin flower bud development tobacco 77
crown gall acetosyringone 359
Artemisia dracunculus tarragon essential oil phenylpropenes allylanisole 365
Artemisia dracunculus tarragon essential oil phenylpropenes allylanisole methyl eugenol 377
sugars invertase shoot multiplication sour cherry 911
Tobacco
Nicotiana tabacum Phaseolus vulgaris Pisum sativum lipid peroxidation peas Pinto beans 17
tissue culture flower bud development cytokinin 77
Nicotiana alkaloid accumulation cell culture 1371
Tomato
salinity CO_2 fixation cell cultures *Atriplex* 531
lettuce cucumber salinity hydrogel polymer salt tolerance growth free amino acid free proline and protein 891
Trace metals
EDTA micronutrients computer simulation deficiencies absorption iron manganese copper zinc 509
DTPA EDTA micronutrients computer simulation plants absorption iron manganese copper zinc 515
Transformed roots
Agrobacterium rhizogenes Medicago sativa transgenic plants *Onobrychis viciifolia* 1147
Agrobacterium rhizogenes rol genes TR-DNA transgenic plants plant phenotype *Solanum dulcamara* 1279
Transgenic plants
Agrobacterium rhizogenes Medicago sativa transformed roots *Onobrychis viciifolia* 1147
Oryza sativa rice protoplasts direct DNA uptake NPTII kanamycin-resistant tissues gene expression and inheritance DNA hybridization 1159
Agrobacterium rhizogenes rol genes TR-DNA transformed roots plant phenotype *Solanum dulcamara* 1279
Translocation
white clover partitioning 705
Transpiration rate
leaf water content leaf water potential water flow resistance 541
Transport
Ricinus communis potassium sodium chloride calcium magnesium phloem xylem partitioning salinity 1105
TR-DNA
Agrobacterium rhizogenes rol genes transformed roots transgenic plants plant phenotype *Solanum dulcamara* 1279
Triacylglycerol synthesis
Brassica napus callus photomixotrophic polyploidy 1551
Trichlorfon
Anabaena cyanobacteria heterocysts nitrogenase 1595
Trifolium repens
white clover water stress vegetative growth 311
Triticosecale
free vibrations peduncle stiffness measurement Young's modulus 1207
Triticum aestivum
aleurone tissue acid phosphatase plant growth regulators 387
$^{11}CO_2$ radioactive photosynthate flag leaf wheat ear 469
wheat development base temperature thermal time 1077
soil moisture soil strength root drought stress biomass yield leaf tillering phenology wax 1225
nitrate sowing depth seedling growth seedling emergence 1449
Tropane alkaloids
Datura innoxia callus culture androgenic plants 1073
Trypsin digest
monoclonal antibodies peanut anionic peroxidase glycopeptide 935
Tumours
Arabidopsis hormones gamma-rays glycine-rich protein 1363
Turgor pressure
growth wall rheology osmotic stress osmotic adjustment 1043
UAE
AAE xylem vessels cavitation 123
Ultraviolet radiation
Brassica campestris Brassica carinata fibre optics light scattering *Medicago sativa* optical properties ozone depletion photosynthesis 547
Uptake
apoplast iron nicotianamine symplast 1517
Vacuolar ion levels
pressure probe single cell sampling wheat 305
Vacuoles
compartmentation endocytosis (fluid-phase) fluorescent probes membrane transport 565
Vegetative growth
Trifolium repens white clover water stress 311
Vigna unguiculata
Glycine max hydrogenase nitrogenase nitrogen fixation nodules 1379
Vigour
muskmelon *Cucumis melo* L. seed priming germination temperature development 393
muskmelon *Cucumis melo* L. seed development dormancy germination after-ripening 1137
Violaxanthin-cycle
Hordeum vulgare carotenoids etiolation 229
Vitis vinifera L.
assimilate partitioning phloem translocation mechanism water potential gradients 1117
VPD
Bromelia humilis CAM PPFD dark respiration temperature water stress 25
Wall pH
acid growth fusicoccin *Regnellidium diphyllum Nymphoides peltata* 1171
Wall rheology
growth turgor pressure osmotic stress osmotic adjustment 1043
Water deficits
carbohydrates carbon partitioning heat stress photoinhibition photosynthetic capacity stomatal limitation 1
Helianthus annuus drought leaf water potential stomata growth assimilation 589
Water flow resistance
leaf water content leaf water potential transpiration rate 541
Water potential
Ferocactus acanthodes Opuntia ficus-indica reverse flow tension 143
conifer photoinhibition photosynthesis *Picea Pinus* root temperature stomatal conductance 611
Water potential gradients
assimilate partitioning phloem translocation mechanism *Vitis vinifera* L. 1117
Water relations
evergreen sclerophylls sun and shade leaves chlorophyll proline 627
leaf elongation gas exchange photosynthesis 881
Water-relations parameters
Chara inflata ion channels membrane conductances 151
Water stress
Bromelia humilis CAM PPFD dark respiration temperature VPD 25
Trifolium repens white clover vegetative growth 311
Zea mays L. cell membrane stability leaf water potential osmotic adjustment osmotic potential potassium nutrition 739
drought *Phaseolus vulgaris* ABA in xylem sap, leaves and roots 1507
Wax
Triticum aestivum soil moisture soil strength root drought stress biomass yield leaf tillering phenology 1225
Wet aerosol
air pollution fluorescence microscopy 757
Wheat
pressure probe vacuolar ion levels single cell sampling 305
cold acclimation kinetic enzymes proline metabolism 673
immunocytochemistry protein bodies rough endoplasmic reticulum Golgi apparatus 1347
anchorage seminal roots grazing 1601
anchorage coronal roots lodging 1607
Wheat development
base temperature thermal time *Triticum aestivum* 1077
Wheat ear
Triticum aestivum $^{11}CO_2$ radioactive photosynthate flag leaf 469
Wheat seedlings
anoxia pH temperature 1427
anoxia glucose O_2 pretreatment alcoholic fermentation 1437
White clover
Trifolium repens water stress vegetative growth 311
translocation partitioning 705
Wounded cells
asparagus dedifferentiation gene expression 791
Wounding
slow wave of depolarization electrogenic pump *Bidens pilosa* L. calcium 131

X-ray microanalysis
Robinia pseudoacacia leaf movements pulvinus 1315
Xylem
Ricinus communis nitrogen nitrate nitrate reduction phloem partitioning flow models 1091
Ricinus communis potassium sodium chloride calcium magnesium phloem transport partitioning salinity 1105
Xylem and phloem transport
Ricinus communis ion balance K^+ economy Na^+ exclusion NaCl-stress salt tolerance leaf development 1051
Xylem embolism
hydraulic conductivity heartwood formation *Populus tremuloides* cavitation 1399
Xylem sap
antitranspirant activity ABA ABA bioassay 317
arginine asparagine *Casuarina* sp. citrulline combined N *Frankia* glutamine nitrogen fixation proline 1493
Xylem transport
amino acids mistletoes host:parasite relationships N metabolism 441
Xylem vessels
UAE AAE cavitation 123
Yield
Triticum aestivum soil moisture soil strength root drought stress biomass leaf tillering phenology wax 1225
Young's modulus
Triticosecale free vibrations peduncle stiffness measurement 1207
